Factory Resetting a Module

Products: MCC-8004 Series, VCC-8000 Series, Rainier Series, MCC-8001 Series, ACC-8000 Series

Resetting Your Module back to the Factory Defaults

Step 1

Power OFF the module if it is still running.

Step 2

On the back of the module locate the two dip-switches, left of the rotary ID.

Step 3

Flip down (ON) position switch 2.

Step 4

Power ON the module. On your display you should see the Avitech logo (default) followed by the video window layout arrangement to default positions.

Step 5

Flip up (OFF) position switch 2.

Factory Reset procedure is now complete.

Notes:

1. If you have more than one module, each module must be reset individually

2. If factory resetting a Rainier-4/8/12/16U1V, flip down switch #2 on the lower bank of dip-switches.
