

## Audio Terminal Block

Products: MCC-8004 series, ACC-8000 series

Some MCC and ACC Modules models support Analog or AES/EBU audio inputs for alarms and monitoring.

The DB25 connector on the module is used in conjunction with an Avitech DB25 terminal block adaptor for accepting audio.

The audio option supports 4 pairs of analog stereo inputs or 8 channels of AES/EBU.

Pin-out for DB25 audio connector on Module
